Warning: Attaching reference (interlingual)

Hypothesis: Accidents are preventable. Therefore, more safety training should be provided. If we can reduce the frequency of these accidents, the overall safety of our workplace will improve.

I believe that by implementing the following measures, we can significantly reduce accidents:

1. Regular safety training sessions for all employees.
2. Installation of safety equipment in high-risk areas.
3. Monitoring and enforcement of safety protocols.

By taking these steps, I am confident that we can create a safer working environment for everyone.

Thank you for considering my proposal. I look forward to your feedback.
